The Dexter Regional Airport occupies approximately 311 acres of Town owned land. The airport maintains a 3000-foot runway was constructed in 1941.

The Pittsfield Municipal Airport is a terrific asset for the area. Pittsfield's general aviation airport is especially attractive to business executives who travel frequently. Its service area is considered to extend for a 20-mile radius, and the estimated existing annual passenger level is 48,000 people.

The airport currently has two full-time fixed-base operators. There is no designated passenger terminal building at the airport; however, both FBOs provide passenger/pilot facilities and services.
